EXPOSING THE COMING BIO-TERROR PANDEMIC

BIOTERRORBIBLE.COM: The following bio-terror scares occurred within the calendar year of 2009. While some of the following reports may have been legitimate cases, most if not all of them appear to be generated man-made scares with the overall goal of convincing American and the world that it is on the precipice of a major pandemic. The fact that these bio-terror scares exist in mass confirms that an upcoming bio-terror attack is in the cards and may be played in a last ditch effort to regain political, economic and military control of society.

Title: Suspicious Envelopes Sent To U.N. Missions Apparently Contained Flour

Date: November 11, 2009

Source: [Bio Prep Watch](#)

Abstract: Looks like flour was the suspicious powder inside those envelopes sent to several United Nations missions.

A fifth foreign mission received an envelope with a suspicious white powder inside on Tuesday, WABC reported.

New York City police say the mission to the United Kingdom was the last to receive a letter. The German mission to the U.N. got a similar package earlier Tuesday.

Three other envelopes arrived Monday at the missions of France, Austria and Uzbekistan.

New York Police Department spokesman Paul Browne says tests revealed the substance contained in those three letters was flour. Test results are pending on the other two letters.

"I was scared," Lindsey Morrone, who works in the Manhattan office building that contains the British mission, told The Associated Press. "There were people in the office walking around with napkins over their faces, in fear that the spores could be spread through the ventilation system."

No one was hospitalized Monday night, but 43 people were decontaminated, officials said.

"Nobody's sick as far as we know," a high-ranking police source said. "This is a precautionary measure."

"The New York police did their work and did it well," said French U.N. Ambassador Gerard Araud. "There is a 99.9 percent chance that we are talking about a bad joke, but you have to be careful."

Several of the notes in the envelopes were reported to contain a single-line message of "al-Qaeda FBI in America," the *New York Post* reported. At least four of the envelopes had Dallas postmarks. The incident is being looked into by the Joint Terrorism Task Force, which intends to determine if the envelopes contain any DNA, United Press International reported.

FBI spokesman Richard Kolko says his office is trying to locate the sender ([Bio Prep Watch, 2009](#)).
