

Bio Terror Bible

EXPOSING THE COMING BIO-TERROR PANDEMIC

BIOTERRORBIBLE.COM: The Sunshine Project was a foundation funded program that existed in Europe and the United States from 2000 until 2008. While its purpose was never clearly defined, it acted as a source of information in respect to the highly illegal and highly unethical scientific practices occurring in the field of microbiology, specifically in bio-terror and bio-weapons research. The Sunshine Project will likely be trotted out in the media post pandemic to shine light on (demonize and blame) the United States for ultimately allowing an environment of underground bio-related research to flourish.

Title: Sunshine Project

Date: 2012

Source: [SunshineProject](#)

Disclaimer: As of 1 February 2008, the Sunshine Project is suspending its operations. Although this website is no longer updated, it remains online as an archive of our activities and publications from 2000 through 2008. If you have any questions, please contact us by e-mail at tsp@sunshine-project.org. Thank you for your interest.

AGENT GREEN: The US Biological Weapons Project That Refuses to Die

Biological weapons are being developed to kill illicit crops of coca, opium poppy, and cannabis in forced crop eradication programs. The pathogenic fungi were developed principally by the US for use in narcotics-producing areas globally; but especially Asia and South America. The agents threaten to legitimize agricultural biowarfare, are environmentally unsafe, and threaten wild plants and agriculture in fragile and biodiverse ecosystems. They also endanger human health and, most importantly, the global ban on biological weapons.
