## EXPOSING THE COMING BIO-TERROR PANDEMIC

**BIOTERRORBIBLE.COM:** The following outbreaks occurred within the calendar year of 2010. While some of the following reports may have been legitimate outbreaks, most if not all of them appear to be generated man-made outbreaks with the overall goal of convincing American and the world that it is on the precipice of a major pandemic. The fact that these outbreaks exists in mass confirms that an upcoming bio-terror attack is in the cards and may be played in a last ditch effort to regain political, economic and militarial control of society.

**Title:** Mysterious Plague Outbreak Among Syrian Army

**Date:** July 6, 2010

**Source:** [Bio Prep Watch](#)

**Abstract:** An outbreak of plague, which is considered a potential bioweapon, among the Syrian military may be raising more questions than answers.

Syrian President Bashar al-Assad recently ordered the shutdown of all Syrian military exercises due to a plague that currently affects a large number of military personnel, according to Examiner.com.

The Syrian president has told Syrian news sources that food and drinking water in military bases, coupled with one of the country's worst droughts in over 40 years, are responsible for the outbreak of plague.

Hundreds of thousands of Syrians are experiencing food shortages, nearly 60,000 small livestock owners have lost all their animals and 50,000 others have lost 50 to 60 percent of their cattle.

The infectious bacterium *Yersinia pestis* causes the infectious disease plague, which is commonly found worldwide in rats and other rodents. Fleas often serve as common vectors of plague. There are three forms of human plague – bubonic, septicemic and pneumonic.

Humans may also be infected by direct contact with an infected animal, through inhalation and, if it is pneumonic plague, by person to person contact.

Drinking water, food and a heat wave are not common causes of plague, Examiner.com says, unless they have increased the contact between humans and plague carriers.

Because of this, the article says, questions should be raised about the true cause of the Syrian army plague ([Bio Prep Watch, 2010](#)).
